

THE HUMAN ROLE SHIFTED. THE AUTHORIZATION POINT DID NOT.

CONVENTIONAL

AGENT-MEDIATED — MOTIVATING CASE

THE ROLE THAT MOVED

producer      —————>    director · evaluator · authorizer

The human does less of the producing and more of the deciding.

THE POINT THAT DID NOT

Authorization still enters the lifecycle where review happens to occur.

Where it is not declared, it cannot be located, checked, or carried.

*The question is not who does the work. It is what makes the resulting behaviour authorized to execute.*

This figure motivates the question. It reports no result; the conditions are argued, not measured.
